MINING SITE KIT

Brake, headlight and noise compliance on one instrument.

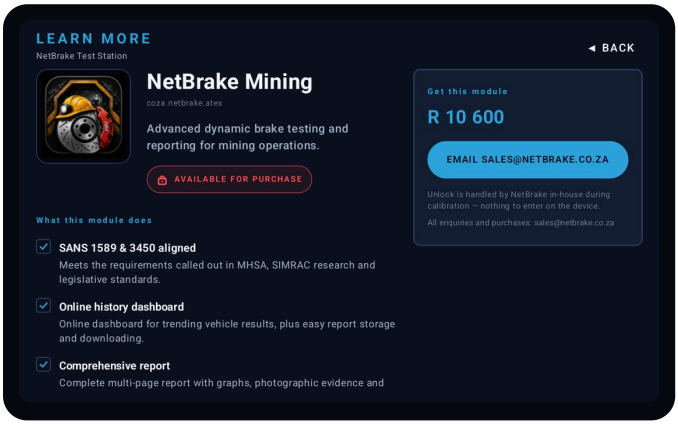

Test haul trucks and site vehicles to SANS 1589 and 3450, then check headlight lux and operator noise with the same unit. One kit, one report trail, one supplier for calibration.

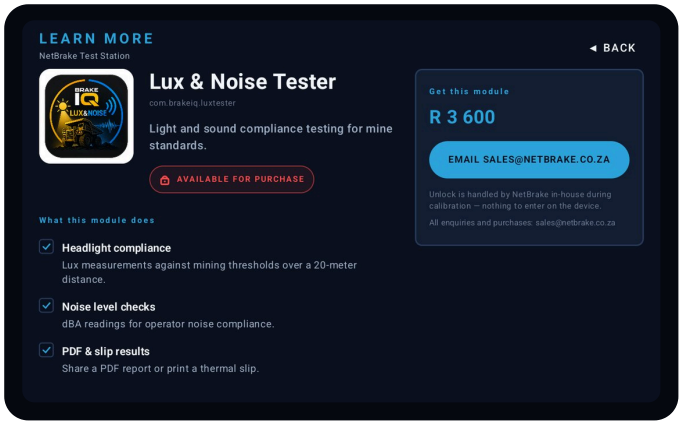

MINING SITE KIT

WHAT IS ON THE QUOTE

BIQ024 · Brake IQ ULTRA Instrument, IP67 hard case, NetBrake Legacy	R44,016.00
NetBrake Mining Advanced dynamic brake testing and reporting for mining operations.	R10,600.00
Lux & Noise Tester Light and sound compliance testing for mine standards.	R3,600.00
Balance due	**R58,216.00**

Need per-wheel proof? Add SensorLink: up to 8 wireless wheel sensors. Price on request.

WHY IT PAYS

SANS 1589 and 3450 aligned
NetBrake Mining meets the requirements called out in MHSA, SIMRAC research and legislative standards.

Evidence on file
Multi-page reports with graphs, photographic evidence and digital signature, plus an online history dashboard.

Lux over 20 metres
Headlight measurements against mining thresholds, and dBA readings for operator noise.

Price it in under a minute. Build your quotation.

Use the "Build my quotation" button in our email. The instrument is already on the quote: tick the modules you want and download the official PDF, valid for 30 days.
